

# My Read Me Document.

Greetings ladies and gentlemen. My name is Luvo Tshangela from the IIE Varsity College in Pretoria and this is my presentation of my Luu's Meal Plan. I will be presenting this document to a customer to suggest an application that will cater for his/hers healthy diet meal plan for the day. This application will be created on ANDROID STUDIO.

## Luu's Meal Plan.

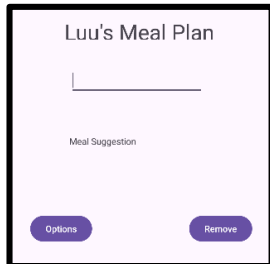

## How to use this application?

- This application can be accessed on my Android Studio.
  - Client will need access to a Virtual Machine.
  - Client must enter the time of day in the.
- Client must then proceed to press the Options button for an of meal suggestions.
  - To clear the output press the Remove button.

# All you need to about Luu's Meal Plan.

## 1. Summary of what the application does.

To use this application as a client you firstly need to select the Edit View operation which is designed for a client to be able to input the time of day (Morning, Mid Morning, Afternoon, Dinner), select the button named "Options", and it will display the list of meal options in the Text View named "Meal Suggestions" Luu's Meal Plan has to offer.

## 2. What food options does Luu's Meal Plan offer?
